8	Exemptions and important information	41

#### 1 Introduction

## SCHÄEFFLER

## Process instruction on Prohibited and Declarable Substances Standard S 132030-1

#### Structure of S 132030-1

- 1. Standard with complete description
- 2. Appendix A
  - Declaration of Conformity
  - List of legal requirements
  - List of purchased products
  - List of substances
- 3. Appendix B
  - IMDS Guideline for Suppliers

The last version of this standard is valid since Jan. 11, 2023 and is now also available for suppliers on the Internet. Therefore, please use only the new version from now on.

This process instruction will focus on Annex A, because this is where most problems occur.

#### 1 Introduction

## **SCHAEFFLER**

#### Process instruction on Prohibited and Declarable Substances Standard S 132030-1

Within the framework of Quality Assurance Agreements (QAA), e.g.:

- QAA S 296001 Quality Assurance Agreement with Production Material Suppliers
- QAA S 296002 Quality Assurance Agreement with Tooling Suppliers
- QAA S 296003 Quality Assurance Agreement with Packaging Material Suppliers
- QAA S 296004 Quality Assurance Agreement with Aerospace-Suppliers

will be checked at Schaeffler according to S 132030-1 all

- · Purchased products,
- Chemicals,
- Mixtures,
- Products,
- · Raw materials and
- Packaging materials

#### 1 Introduction

## Process instruction on Prohibited and Declarable Substances Standard S 132030-1

if they contain

- · prohibited,
- declarable or
- restricted substances.

Checking according to S 132030-1 shall ensure that

- employees are not exposed to critical substances.
- Schaeffler products do not contain any critical substances (or, if necessary, these can then be declared to Schaeffler customers
  - E. g. lead in brass-cages) and Schaeffler thus meets worldwide legal requirements.

## Agenda

## **SCHAFFI.ER**

## Process instruction on Prohibited and Declarable Substances Standard S 132030-1

- Select the applicable category A, B or C for the product: See Internet entry Prohibited and declarable substances, Applicable documents Note: Language can be changed on top of this side: DE or EN
- Fill in data on the product: Top left in the declaration of conformity If the Declaration of Conformity is completed for more than one product, please enter "Table" here for Product and complete the separate "List of purchased products" spreadsheet.
- Fill in data on the supplier: Top right in the declaration of conformity If the Schaeffler supplier number is not known, please contact Schaeffler Purchasing. Please do not overwrite the line Schaeffler signature (will be filled in by Schaeffler)!
- Schaeffler status: Directly below the product data in the declaration of conformity Schaeffler Status will only be filled by Schaeffler.

## **SCHAEFFLER**

#### Process instruction on Prohibited and Declarable Substances Standard S 132030-1

- 5. Filling of the declaration of conformity: Directly below the category selection Filling in the declaration of conformity: Depends on the respective category A, B or C for the product.
  - Point 1-3 must be completed for all products: Category A, B and C
    - Point 1, Schaeffler principal prohibitions
    - Point 2, Schaeffler substance restrictions
    - Point 3 (4 sub-points): REACH EU, POP Regulation, TSCA and Applicable Laws
  - Point 4 must be completed for all products that remain on Schaeffler sales products in the automotive sector: Category A
    - Point 4, ELV (End of Life Vehicles)
  - Point 5 must be completed for all products which remain on Schaeffler sales products in the automotive and non-automotive (industrial) sectors: Category A
    - Point 5, GADSL (Global Automotive Declarable Substance List)
  - Point 6 must be completed for all products that remain on Schaeffler sales products in the non-automotive (industry) sector: Category A
    - Point 6, RoHS (Restriction of Certain Hazardous Substances)

## **SCHAEFFLER**

#### Process instruction on Prohibited and Declarable Substances Standard S 132030-1

- 5. Filling in the declaration of conformity Depends on the respective category A, B or C for the product.
  - Point 7 must be completed for all chemicals and mixtures that remain in or on Schaeffler sales products: Category A or which do not remain in or on Schaeffler sales products: Category B
    - Point 7, Further requirements for chemicals and mixtures
  - Point 8 must be completed for all packaging materials supplied to Schaeffler customers: Category C
    - Point 8, Further specifications for packaging materials used by Schaeffler for packaging and delivered to the customer.
  - Point 9 must be completed for all purchased products that remain on Schaeffler sales products in the Railway division. Category A
    - Point 9, Rail Industry Substance List (RISL) by UNIFE (Union of European Railway Industry)
  - Point 10 must be completed for all purchased products that remain on Schaeffler sales products in the Aerospace division. Category A
    - Point 10, Aerospace and Defense Declarable Substances List (AD-DSL), which is created and maintained by International Aerospace Environment Group (IAEG)

## Process instruction on Prohibited and Declarable Substances Standard S 132030-1

- 6. Declaration in Schaeffler format Alternative to IMDS: Directly below the declaration of conformity block
  - If substances have to be declared, they must be entered at this point:
    Substance name, CAS number, concentration and, if applicable, remarks (lead is given as an example).
    This input is not required at this point if a declaration is made via IMDS.
- 7. List of substances: Separate spreadsheet
  - Here are listed prohibited and declarable substances which must be complied with by the product.
  - In addition, the requirements listed apply (e. g. REACH EU, GADSL, RoHS...).
  - From now on all PFAS (Per- and Polyfluorinated Alkyl Substances) must be declared.

## Process instruction on Prohibited and Declarable Substances Standard S 132030-1

- 8. List of legal requirements: Separate spreadsheet
  - Here the supplier must enter which laws his product complies with.

    Column A: The law concerned e. g. RoHS, Column B: The corresponding country law, Column C: The country for which this law applies, Column D: Here must be filled whether this law is valid for the product (yes/no), each line must be filled with yes or no!
    - If yes, at least one of the following columns must be filled!
    - If no, no further columns need to be filled.
  - Note: If the product does not comply with any laws (i. e. no entries or everywhere "no"), the product will no longer be released!
- 9. List of purchased products: Separate spreadsheet
  - This spreadsheet must be completed if the declaration of conformity applies to more than one product at the same time.
  - Some entries from the declaration of conformity spreadsheet are automatically transferred to this spreadsheet; the missing data must be entered.

# Agenda

## 3 Conformity Declaration – Complete Conformity Declaration

#### Process instruction on Prohibited and Declarable Substances Standard S 132030-1

First an overview of the declarations of conformity A, B and C, and their selection:

Declarations of Conformity A, B, C and Selection of Declaration of Conformity See: Prohibited and declarable substances, Applicable documents

- The process instruction goes through the declarations of conformity step by step, because there were already problems with the old version when filling them in correctly. The selection of the categories and the forms of the declarations of conformity are designed differently and material compliance requirements are partly supplemented.
- The supplier must fill in the corresponding declaration of conformity completely and correctly!
- At the right side of the Conformity Declaration we added an explanation (red colored), that helps the suppliers to fill the Conformity Declaration correctly.
- We need the filled Conformity Declaration from the supplier in Excel and PDF format!
  - Excel: Material Compliance must evaluate the Conformity Declaration and must document this evaluation (e. g. for audit).
- PDF: To avoid changes of the original document of the supplier (e.g. with signature of the supplier with or without stamp and afterwards scanned).

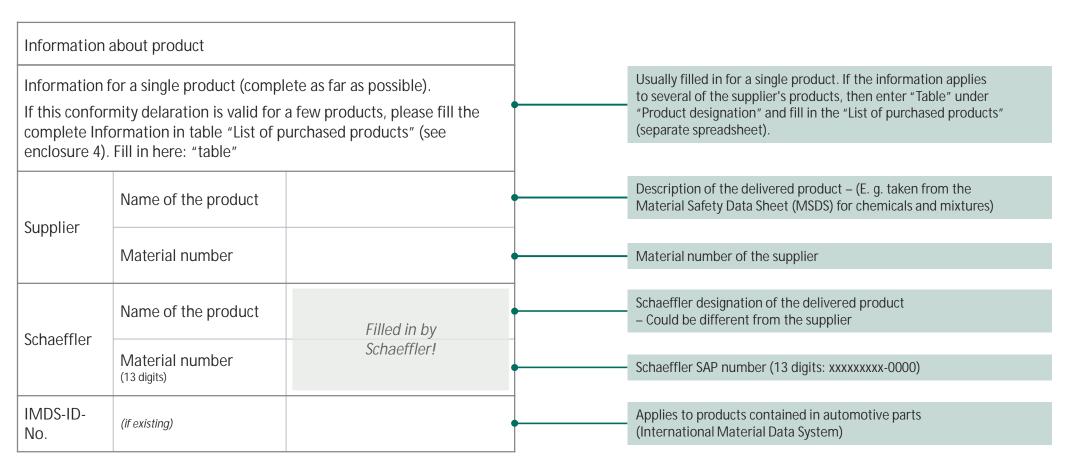

Extract from S 132030-1, page 3, 4 Supplier information, list of purchased products: Because of the large number of its suppliers, Schaeffler must rely on an automatic evaluation therefore the completely filled in, signed and scanned supplier's conformity declaration must always be returned to Schaeffler as a PDF document together with the completed list of legal and official requirements. In addition, the completed Excel document should also be returned.

Supplier information can only be accepted if at least the "Basic information" and "Declaration of conformity" zones in the Excel template are completed fully and correctly, and if the document is duly signed.

#### 3 Conformity Declaration

16

## 3 Conformity Declaration – Select Category A, B, or C

#### Process instruction on Prohibited and Declarable Substances Standard S 132030-1

Selection of the corresponding Category for the Conformity declaration: See also Internet entry

- 1. Category A must be selected for purchased products, which remain in oder on saleable Schaeffler products.
- 2. Category B must be selected for purchased products, which are used in manufactoring processes and maintenance, but do not remain in saleable Schaeffler products.
- 3. Category C must be selected for purchased products, which are used as packaging for Schaeffler sales products and are delivered to the customer.

If necessary, the corresponding category must be clarified with the Schaeffler contact (e.g. local purchasing, substance manager or application technology).

If categories A and B apply to a purchased product (e. g. corrosion protection oil is used as an intermediate preservative and as a final preservative), then the higher-value category (category A in the example) must be selected.

If categories A and C apply to a purchased product (e. g. VCI paper is used as intermediate and final packaging with corrosion protection), then the higher-value category (category A in the example) must be selected.

If categories B and C apply to a purchased product (e. g. VCI paper is used as intermediate packaging with corrosion protection), then the higher-value category (category B in the example) must be selected.

## Only valid for Category A

N	lo.	Requirements apply to	Material Compliance (MC) Requirements	Is the requirement valid for the purchased product?	Is the purchased product compliant?	Declaration IMDS, Schaeffler- Format or no declarable substances
1	0	All purchased products for Aerospace	Aerospace and Defense Declarable Substances List (ADDSL), which is created and maintained by International Aerospace Environment Group (IAEG)			
			ourchased products that Aerospace sales products.	Choose "yes" or "no" (dropdown)	Choose "yes" or "no" (dropdown)	IMDS, Schaeffler- Format, No declarable substances or Return to supplier (dropdown)

## 3 Conformity Declaration

## SCHAEFFLER

## Process instruction on Prohibited and Declarable Substances Standard S 132030-1

Declarable Substances According to actual List of Substances (\$ 132030-1)	CAS Number other Identification number – Only if CAS number is not available	Quantity of substance	Unit according to List of Substances	Remarks*1	
Example Lead (Blei)	7439-92-1	e. g. 2,0	% (w/w)	e. g. Brasscage	
Indication of the ingredient(s) to be declared.	Here in the example the CAS number of lead	Amount of the substance in	Unit of quantity; Usually % (w/w),	Indication of the product in which the ingredient to	
In this example, lead, which is an ingredient in a brass cage.		the product. In the example 2,0	but also ppm, mg/l, mol/l is possible	be declared is contained.  Only a (construction) part of the entire product may be affected (brasscage of a bearing).	

#### 3 Conformity Declaration

## Process instruction on Prohibited and Declarable Substances Standard S 132030-1

		CAS Number other Identification number – Only if CAS number is not available	Quantity of substance	Unit according to List of Substances	Remarks*1
Example	Lead (Blei)	7439-92-1	e. g. 2,0	% (w/w)	e. g. Brasscage
	Methanol	67-56-1	100	% (w/w)	Prohibited substance, only released as carburising substance for use in heat treatment

\*1 = Example for prohibited substance; Reason; Affected material is present in the product; RoHS or ELV exceptions; For chemicals and mixtures; Analytical method;

- Information is required here if no alternative such as IMDS or parts list declaration is available.
- · Here is the possibility to document,
  - why a prohibited or declarable substance is nevertheless released and
  - for which application the release applies.
- Here supplier can specify the analytical method used to determine the substance and the amount of substance, especially if there are various methods of analysis for this substance.

## Process instruction on Prohibited and Declarable Substances Standard S 132030-1

Example of Conformity Declaration Category A for a purchased part for a saleable Schaeffler product

Valid for EU and US

Select Example of Conformity Declaration Category A,

Spreadsheet: Declaration of Conformity Cat. A

Sustainability | Schaeffler Germany

See Prohibited and declarable substances, Training documents and Examples, Example Category A Example of Conformity Declaration Category B for a mixture for production process

Valid for FU and US

Select Example of Conformity Declaration Category B,

Spreadsheet: Declaration of Conformity Cat. B

Sustainability | Schaeffler Germany

See Prohibited and declarable substances, Training documents and Examples, Example Category B Example of Conformity Declaration Category C for a packaging material for Schaeffler customers

Valid for EU and US

Select Example of Conformity Declaration Category C,

Spreadsheet: Declaration of Conformity Cat. C

Sustainability | Schaeffler Germany

See Prohibited and declarable substances, Training documents and Examples, Example Category C

Please note that in the case of preserved (metal-)purchased parts, the preservation must also be included in the declaration of conformity! Critical substances in the corrosion protection oil must be declared and avoided as far as possible (e. g. Ba)!

#### 7 Basics

## SCHAEFFLER

## Process instruction on Prohibited and Declarable Substances Standard S 132030-1

#### **Basic Information**

- All purchased products, chemicals and mixtures must meet the substance prohibition standard \$132030-1!
- Therefore, all our suppliers must accept the substance prohibition standard \$132030-1.
- Prohibited substances (P) are generally prohibited ≥ 0.1% or above the applicable threshold.
- Prohibited substances (P) must always be declared < 0.1 % or below the applicable threshold (D)!

## Exemption

- In exemptional cases, prohibited substances may be released for specific purposes: E. g. methanol for heat treatment (carburisation process).
- Exemptions must always be documented in writing. No format is provided for this. For example, an email or an entry in the Declaration of Conformity is sufficient.

## Process instruction on Prohibited and Declarable Substances Standard S 132030-1

1. Where can the supplier find the standard S 132030-1?

Under: <a href="https://www.schaeffler.de/content.schaeffler.de/en/schaeffler-germany/purchasing-and-supplier-management/sustainability/index.jsp">https://www.schaeffler.de/content.schaeffler.de/en/schaeffler-germany/purchasing-and-supplier-management/sustainability/index.jsp</a>

- 2. Contact persons at Schaeffler
  - Responsible Schaeffler Purchasing for: Schaeffler supplier number and formal filling out of declaration of conformity according to \$132030-1.
  - Application engineering at Schaeffler for: Application of the supplied product at Schaeffler Selection of the category (Requestor)
  - Material Compliance at Schaeffler for:
    - Technical questions regarding standard \$ 132030-1, MaterialCompliance@schaeffler.com
    - IMDS reporting (Appendix B), IMDS@schaeffler.com
- 3. MSDS (Material Safety Data Sheet)

MSDS must not be older than 2 years.

4. Does the supplier have to fill out the declaration of conformity according to S 132030-1 if he already makes an IMDS entry? Yes, because this confirms the entire S 132030-1 and, above all, also communicates the legal requirements that the product fulfills.

#### 8 Exemptions and important information

## **SCHAEFFLER**

#### Process instruction on Prohibited and Declarable Substances Standard S 132030-1

- 5. Who receives the declaration of conformity according to S 132030-1 at Schaeffler?

  Responsible Schaeffler Purchasing
- 6. Products for new developments

Jan. 11, 2023

In order to avoid undesirable developments and to prevent the corresponding costs from arising in the first place, it must be ensured right from the start of a new development that the product meets the requirements of S 132030-1! – Schaeffler basic requirement!

7. Who, when and in which form must the supplier inform when the declaration for his product changes (e. g. new legal requirements – Thresholds)?

After 45 days at the latest, the supplier must inform:

- The responsible Purchasing at Schaeffler and
- Department Schaeffler Material Compliance, MaterialCompliance@schaeffler.com
- In the form of a new declaration of conformity for the product according to \$132030-1 (Excel and PDF format), Annex A and/or IMDS declaration.
- 8. Which Version of the Standard must be applied?

Always apply the current version of S 132030-1, which is available on the Internet, currently version 2022.
